Total Utilities Purchased for the University

Type of Service	Consumption	Btu's Per Sq Ft
Electricity	437,583,452 KWH	
Natural Gas	46,460,400 CCF	
Liquid Gas	35,954 Gal	
Water & Sewer	1,783,218 CCF 1,673,052 - Sept 08 correction made to consumption. Accruals on Balance Sheet were corrected.	
Total		209,390

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's award winning combined heat and power plant.
