Total Utilities Purchased for the University

Type of Service	Consumption
Electricity	506,719,832 KWH
Natural Gas	50,042,555 CCF
Liquid Gas	29,710 Gal
Water & Sewer	1,572,714 CCF

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's award winning combined heat and power plant.
