**Total Utilities Purchased for the University**

<b>Type of Service</b>	<b>Consumption</b>
Electricity	488,283,476 KWH
Natural Gas	58,708,083 CCF
Liquid Gas	36,731 Gal
Water & Sewer	1,518,849 CCF

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's award winning combined heat and power plant.
