**Total Utilities Purchased for the University**

<b>Type of Service</b>	<b>Consumption</b>	
Electricity	409,941,231	KWH
Fuel Oil	48,013	GAL
Liquid Gas	11,054	GAL
Natural Gas	51,145,552	CCF
Water & Sewer	1,442,146	CCF

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's centrally located combined heat and power plant.
