Total Utilities Purchased for the University

Type of Service	Consumption
Electricity	422,906,554 KWH
Fuel Oil	0 GAL
Liquid Gas	15,927 GAL
Natural Gas	52,683,066 CCF
Water & Sewer	1,394,854 CCF

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's centrally located combined heat and power plant.
