Total Utilities Purchased for the University

Type of Service	Consumption	
Electricity	431,945,732	KWH
Fuel Oil	0	GAL
Liquid Gas	15,053	GAL
Natural Gas	51,825,882	CCF
Water & Sewer	1,401,686	CCF

Total utilities purchased are presented to provide a complete picture of the energy used by the University. Total utilities purchased are greater than total utilities consumed by the buildings because losses are incurred in the generation of steam and electricity as well as in the University owned distribution systems. However, overall, the sum of disparate equipment distributed across campus would be significantly less efficient than the University's centrally located combined heat and power plant.
